

Analysis on IT Trends

Sloan Howard

June 2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Showing the most used programming languages and database softwares
- Analyzing Job Openings in IT
 - Comparing openings to languages being used
 - Highlighting IT jobs in need
- Lack of Tech in countries
- Highlighting Genders of people in IT positions

INTRODUCTION

- Highlighting trends in IT development
- Questions to answer:
 - What are the top programming languages in demand?
 - What are the top databases being used?
 - Best IDE's to use for IT projects
- Information for:
 - IT Recruiters
 - People aspiring to be in IT

METHODOLOGY

- Collecting Data from various sources:
 - Stack Overflow Developer 2019 Survey
 - Job postings from various websites
 - IT annual salary database
- Cleaning the data
 - SQL, Python
- Analyzing the Data
 - Pandas
- Visualizing the Data
 - Matplotlib, Seaborn
- Presenting the Data

RESULTS

SEE CHARTS IN UPCOMING SLIDES

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Top 3 include: HTML/CSS, SQL, and JavaScript
- Top 3 vastly outweigh the other languages
- People lack knowledge of alternative programming languages

Implications

- Development in HTML will be used for a long time due to the internet
- SQL is the best language for data mining and will continue to grow
- Python is starting to rise the ranks due to its versatility, look out for it to be top 3 in the future.

DATABASE TRENDS

Current Year

Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Top 3 include: SQLite, Redis, PostgreSQL
- SQL dominates database usage
- Redis is an up and coming database

Implications

- Open source databases are in high demand due to its flexibility for companies
- More people want to work in databases compared to the amount of people using them
- Expect PostgreSQL to make a jump in usage in the next year

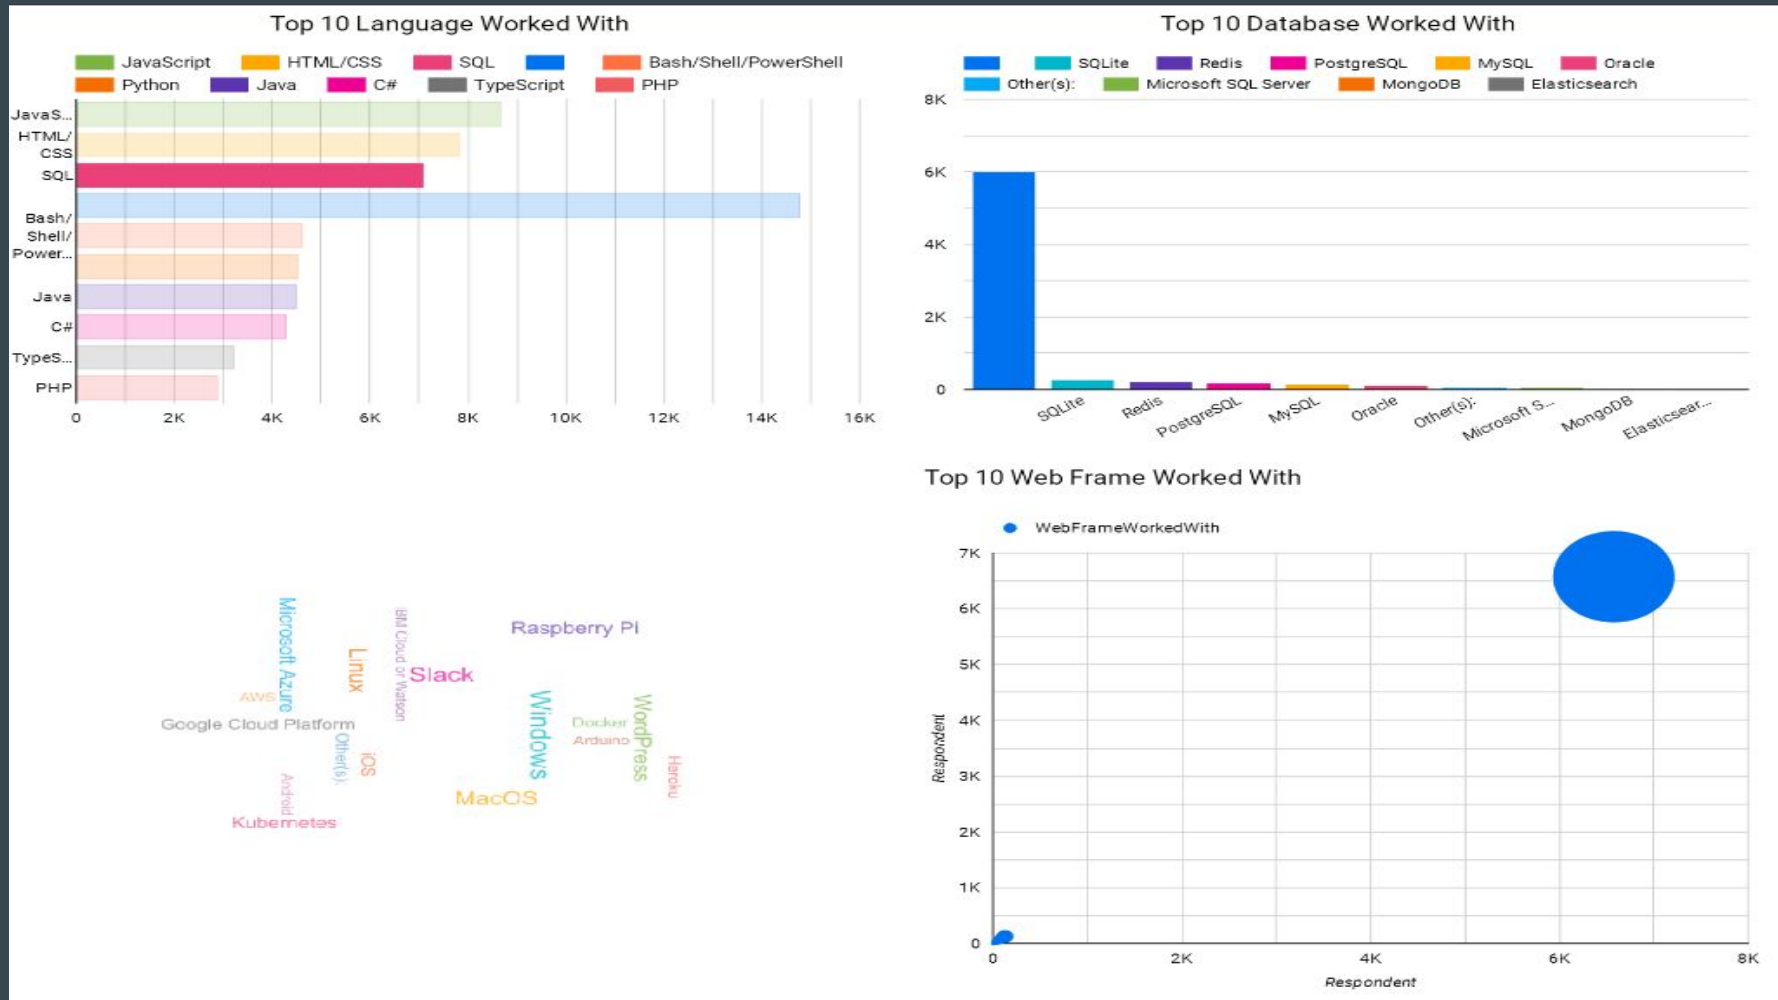

DASHBOARD

DASHBOARD TAB 1

DASHBOARD TAB 2

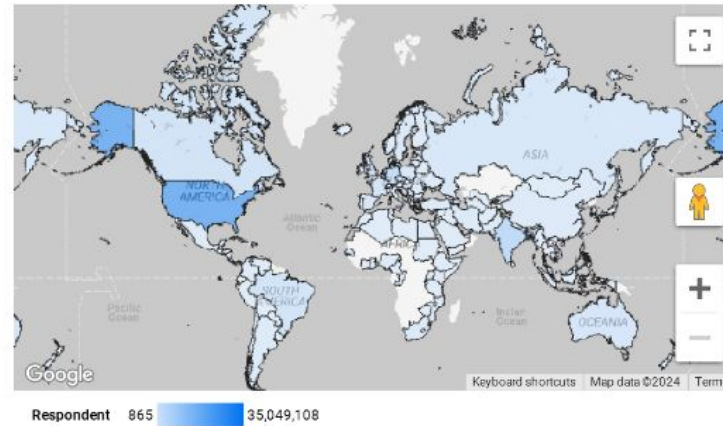

DASHBOARD TAB 3

Respondent classified by Gender

Respondent Count for Countries

Respondent Count by Age

Respondent Count by Gender, classified by Formal Education Level

DISCUSSION

- Graphs show the trends for future use of programming languages and databases are growing!
- Need more female participation in IT
- There is a need for IT training in other countries outside the US
- There is an age and education discrimination that needs to be address with more training for people who cannot be educated thru the school system

OVERALL FINDINGS & IMPLICATIONS

Findings

- Results for IT technologies grow and change by year
- Mainly used in US, Europe, India, China
- Not a lot of females in IT

Implications

- Businesses will have more pressure to keep up technologically or else they will fall behind to competition
- Embrace IT as an occupation in countries that lack
- Open source and cloud databases will continue to grow

CONCLUSION

- Analyzed trends for IT programming languages and databases
- Overview of best languages and databases used
- Overview of up and coming languages and databases for next year
- What actions can be taken with this data

APPENDIX

- Job Postings

POPULAR LANGUAGES
